

## WORK SHEET – OCCUPATIONAL RESEARCH

Using the resources suggested by your teacher choose from two to four occupations to research further. Ensure you choose:

- one you have never heard of before
- at least one which requires university study.

Complete the following for each occupation:

1. What is the name of the occupation?
2. Give a brief description of the occupation (three or four sentences).
3. What level of education is required to enter this occupation?
4. What subjects do you need to study at VCE to get into this occupation?
5. List two courses you could study at university or TAFE to enter this occupation.
6. Does this job require mainly indoor or outdoor work, or a combination of both?
7. For each occupation, answer the question, 'Is this career for me?' Provide at least two reasons why or why not.

*To really discover what an occupation is like, it is best to experience it. Talk to your Careers Adviser about doing work experience so you can discover if this career is for you!*
